

# Energy & Environment Seminar Series

Tuesdays @ 4:00 pm in Room 106, Center for Composite Materials  
*unless otherwise noted*

October 11 (on Wednesday)

Bonnie Ram, Senior Researcher and Associate Director, Center for Carbon-Free Power Integration  
*"Renewable Energy in Denmark and Delmarva: Transitioning to a Clean Energy Economy"*

October 17

Bingqing Wei, Professor, Department of Mechanical Engineering  
*"Nanomaterials for Energy Storage Applications"*

October 24

McKay Jenkins, Cornelius A. Tilghman Professor, Department of English  
*"Highways, Subdivisions, and GMOs: An Environmental Humanities Look at the Way Americans Eat"*

November 7

David Wunsch, State Geologist and Director, Delaware Geological Survey  
*"Water Supply Management Issues in the Delaware River System: A Tale of Tunnels, Transfers, Tumult, and Trout Fishing"*

November 14 (in 366 Colburn Lab)

Holly Michael, Unidel Fraser Russell Career Development Chair for the Environment, Department of Geological Sciences, and Associate Director of Environmental Initiatives, DENIN

November 28

Benjamin Wollet, Ph.D. Candidate, Department of History  
*"Pumping Gas, Mobilizing Interests: A History of Climate Change and Transportation"*

December 5

Andreas Malikopoulos, Associate Professor, Department of Mechanical Engineering  
*"A Decentralized Energy-Optimal Control Framework for Connected and Automated Vehicles"*

December 12

John Byrne, Distinguished Professor of Energy and Climate Policy and Director,  
Center for Energy and Environmental Policy  
*"New Strategies for the New Climate: Thoughts and Observations After the COP23 Bonn Meetings"*

Delaware  
Energy Institute
